Enterprise AI Document Assistant – Test Document

1. Company Overview

TechNova Solutions is a fictional technology company that develops software solutions for businesses. The company provides cloud applications, data analytics, and artificial intelligence services. Its main goal is to help organizations improve productivity through secure and intelligent digital tools.

2. Employee Policy

Employees should maintain professional communication, protect company information, and follow security procedures. Employees must use strong passwords and should not share confidential company documents with unauthorized people.

3. Working Hours

The standard working schedule is Monday to Friday from 9:00 AM to 6:00 PM. Employees receive a one-hour lunch break. Teams may use flexible working arrangements when approved by their manager.

4. Information Security

Company systems must be accessed only by authorized users. Important documents should be stored in approved company locations. Suspicious emails, unexpected login attempts, or possible security incidents should be reported to the IT department immediately.

5. Support

For technical support, employees can contact the IT Support Team. The support team handles account problems, software issues, access requests, and security-related incidents during normal business hours.
